Skyocean Platform Components

Skyocean USPs

Skyocean turns the SME cross-border trade gap into a profitable trading operation, enabling investors to make ROI from physical commodity trade

Strong supply-chain management allows greater flexibility around buyer defaults unlike competitors

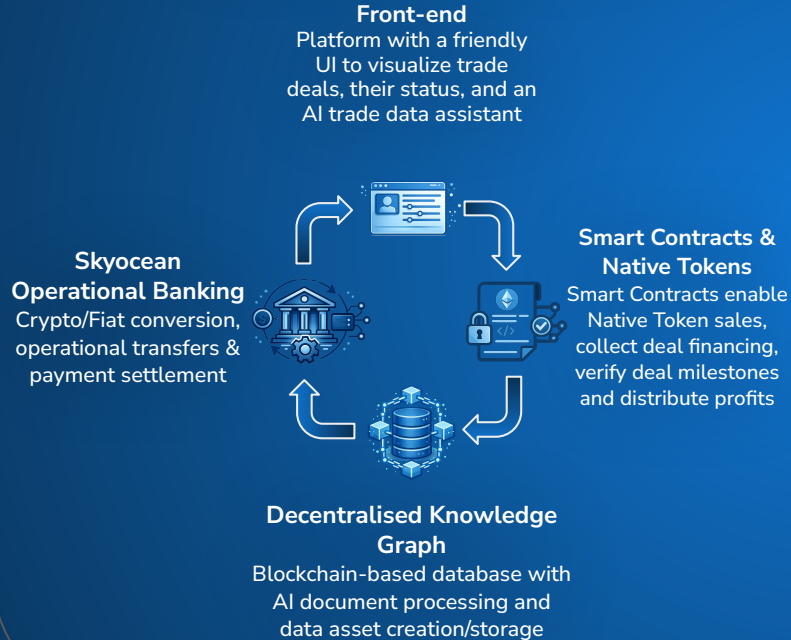

Skyocean owns the commodity, retaining portion of end sale profits without charging interest

Exchanging documents on the blockchain accelerates payment settlement, shortens trade cycle duration & increases annual profitability

Native Tokens unlock new retail liquidity for commodity trading, efficiently scaling Skyocean's working capital and diversifying risk for all investors

Skyocean Platform and Operational Flow

Skyocean Platform Components

Deal Flow

Effortless Participation in International Trade with a Pleasant UX

Intuitive UI allows merchants and token holders to easily submit requests/offers, invest in trade deals, and access insights—no technical expertise required

Front-end

Key Features

Merchant & Token Holder portals on the Skyocean platform

Merchants submit buy/supply requests/offers for physical goods

Token Holders view portfolios, invest in trade contracts, get insights

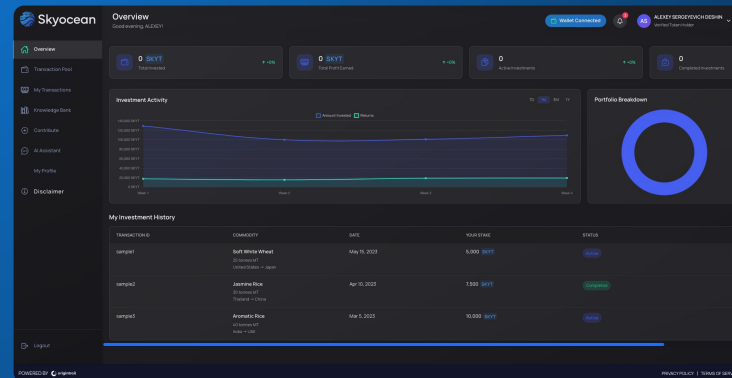

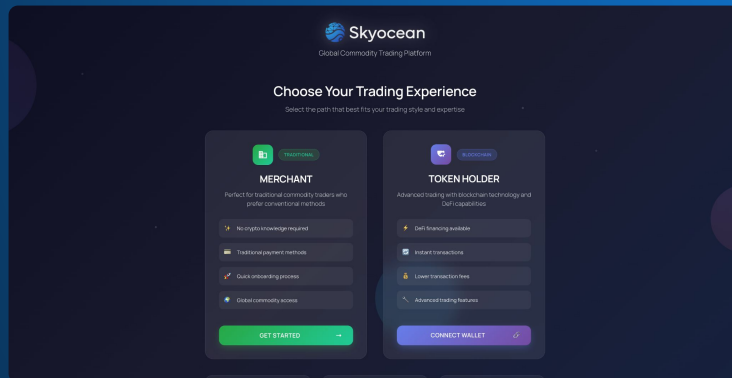

Front-end

Key Benefits

Accessible for stakeholders of all technical levels, no blockchain knowledge required

Save time managing portfolios and submitting RFQs or offers

Leveraging Blockchain technology to increase speed of operation, unlock new liquidity and create data security

Smart Contracts automate deal financing & create transparency, Native Tokens enable international investment, Decentralised Database (DKG) provides data security & integrity

Smart Contracts, Native Tokens and DKG

Key Features

Smart Contracts issue tokens to investors, collect tokens for deal financing, verify supply-chain milestones and distribute profits

Investors fund trade deals by locking their Native SKYT Tokens on the platform

DKG processes documents with AI, creates data assets and stores them on the blockchain, feeding data to Smart Contracts

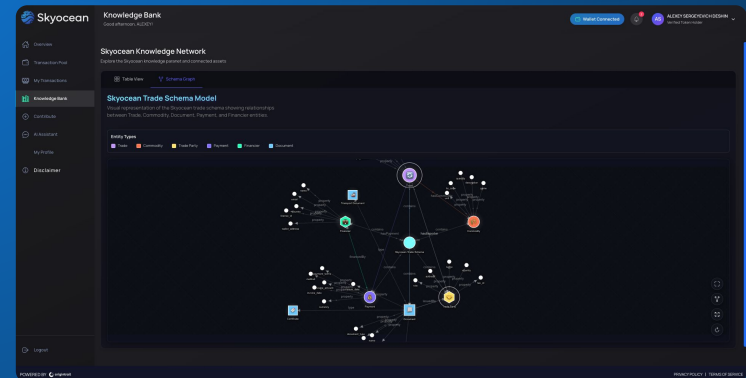

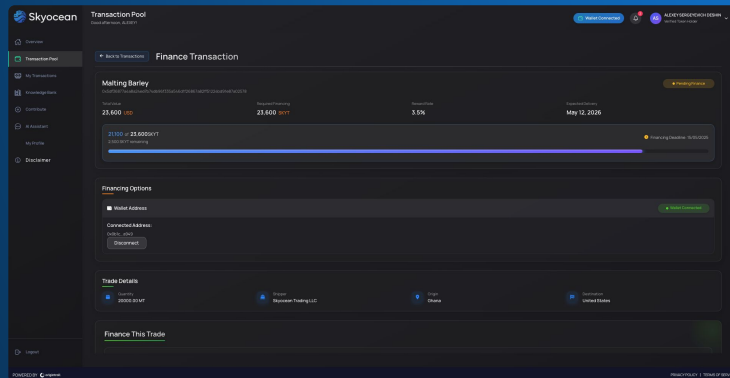

Smart Contracts, Native Tokens and DKG

Key Benefits

Smart Contract infrastructure is visible to investors, creating transparency and trust, while automating the financing process

Tokens unlock an international pool of retail investors - a new source of liquidity for commodity trading

Reduces document verification time and costs by 99.9% and uses decentralized data storage for enterprise-grade data security

Situation: ~50% SMEs can not participate in international trade due to lack of financing from traditional banks¹

Competitors neglect SMEs completely or offer expensive lending, without managing the supply-chain

Regulatory usury caps prevent banks from charging higher interest on loans for sub-\$50M trade deals, severely limiting financing for SME buyers

Sellers give SME buyers unfavorable contract terms and banks are slow to process documents and settle LCs

High interest on small/medium-sized contracts raises costs, making them economically unfeasible for buyers relying on smaller lenders

Lack of direct access to buyers forces SME sellers to work with large corporations on difficult terms

SME sellers suffer working capital gaps from buyer payment delays or defaults

Traditional trading boutique working capital is difficult to scale amid high rates and fragmented private funding

Retail investors are shut out of international trade

Skyocean

finances SME cross-border trade by procuring goods in its name and selling the cargo to end buyers for a profit, while managing most of the supply-chain

Skyocean's ownership of goods enables risk-based pricing, allowing to finance SME buyers

Skyocean offers better terms to buyers, processes documents on the blockchain & settles payments quickly

Skyocean owns the product, prices it fairly and makes deals economically feasible for SME buyers — no interest charged

Skyocean platform connects SME sellers, end buyers and investors, resulting in better terms for all parties

Skyocean stabilizes cashflow by paying SME sellers early, while solving buyer defaults through order re-routing

SKYT Token public offering efficiently scales working capital, financing more deals and further diversifying risk

SKYT Tokens enable international retail to invest in trade

Supplying essential commodities to institutional and private clients in Africa, Latin America and Asia

Business Model

Trade contract profits
Token sales
Trading Services

Skyocean Pipeline in Sudan - Govt partnership signed, LOI in progress

Commodity	1st year pilot pipeline volume	1st year revenue	Sudan govt max annual demand to be fulfilled	Max annual revenue	Source
Wheat / Flour	28,250 MT	~\$11.3M	360,000 MT	~\$144M	Turkey
Sugar	28,250 MT	~\$11.3M	240,000 MT	~\$96M	Brazil
Milk Powder	-	-	240 containers	~\$12M	Poland
Sunflower Oil	-	-	480 containers	~\$14.4M	Turkey
Lentils / Pasta	-	-	Mixed	~\$15.6M	Turkey/Italy
Total		~\$22.6M		~\$282M	

Legal Framework

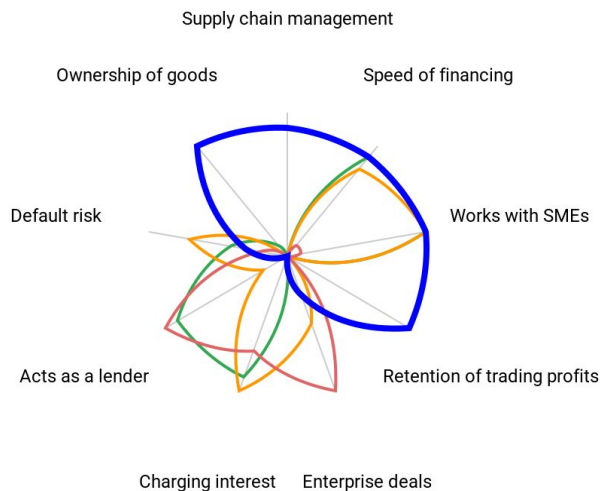

Initial Native Token is a SAFT/mirror token issued via Panama entity to scale trading operations, manage compliance, establish a testing buffer.

Main SKYT token issued after testing phase through Lithuanian entity, aligned with MiCA and CASP regulatory compliance.

Skyocean creates a new way of investing in essential commodity trade

- Skyocean allows investors to finance physical commodity contracts, which enables SMEs to trade internationally.
- We manage most of the supply-chain and accelerate speed of trading operations with our tech to achieve greater flexibility and maximize annual profitability through shorter trade cycles.

Going Live, Scaling Working Capital, Pilot Program Launch in Africa

Skyocean is trading aerospace parts

MVP Live, Pilot Program Signed, Active Fundraising

Fulfilling all contracts of the ~\$22M pilot pipeline, expanding in Sudan and Ghana, attracting institutional liquidity providers

Q2 2025

Q4 2026

Q4 2023

Q2 2026

Q2 2027

First platform infrastructure, integration with Origin Trail Blockchain database

Official platform, Smart Contracts and first Native Token live, fulfilling the first contract of the ~\$22M Sudan pilot pipeline

Financial Analytics and Projections

➤ Pre-seed Round Target: **2M**

Use of Funds

Type	Amount
Working Capital for Trade Financing	1.7M
SG&A:	300,000
Smart Contract & Platform Full Launch	
Smart Contract / Web3 Security Audit	
SaaS tools and Hosting	
Marketing	
Legal & Compliance	

Return Forecast

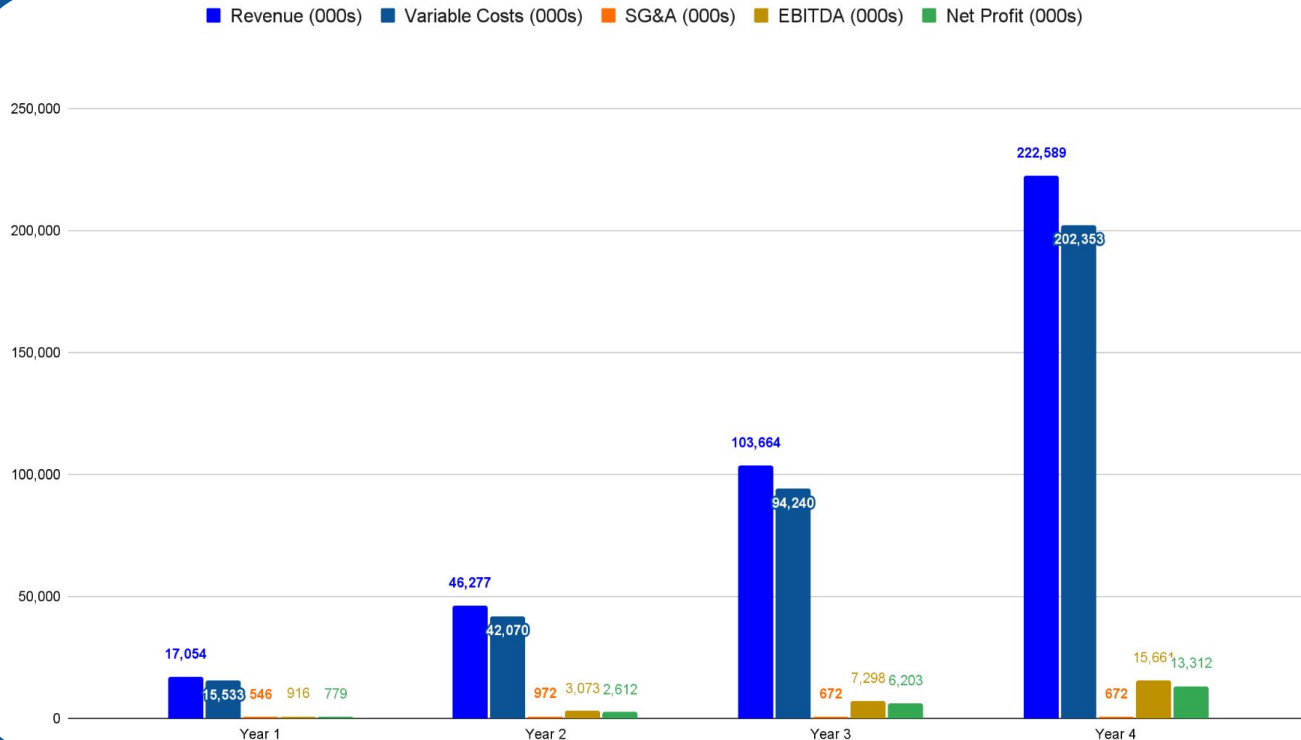

Skyocean avg margin per trade 12.4%

Retail avg ROI per trade 3.86%

Number of trades per year 7

EBITDA YoY growth forecast ~160%

Retail investor annual return ~27%

Disclaimer: These revenue projections are based on analysis and assumptions. While we aim for accuracy, actual results may vary due to uncertainties. Consultation with financial experts is advised. Assumed 2M pre-seed equity raise. Assumed 0.4-2% cost of capital at 10% of contract value financed by retail & 30-40% financed by institutions from Year 3 onwards. Profit margin of a trade contract assumed at 6-20%.
